

## **Functional Horse Training**

*Combining art with science to establish optimal movement*

## **ONLINE WHOLE HORSE DISSECTION**

*“Simplicity is the greatest achievement of knowledge but simplicity without knowledge is the greatest cause of equine injuries” - Cornille 2012*

Have you always wanted to learn from the horse “inside-out”? Join us for the unique opportunity to access 3-day Whole Horse Dissection online live-stream (REPLAY) from your own home to study the horse 'inside-out'. You will get front row views like never before and gain the opportunity to discuss with the team in a closed FB group.

This event is an IDEAL solution if you are still a bit doubting whether this is something for you OR if you want the luxury of this unique experience brought to your home!

This time we have a beautiful 10 year old grey gelding – Gypsy - on the table that has been diagnosed with arthritis and DSLD (Degenerative Suspensory Ligament Desmitis).

During the dissection, we came across many different pathologies including hypermobility, melanoma, parasite damage, arthritis in various places, inflammation, rib abnormalities, worn-out patterns in joints, tendon strain and organ failure(s).

So Have you always wanted to learn more about the horse inside-out? Then make sure to join us on this 3-day journey through the Gypsy’s body!

This dissection is a must for ANYONE involved in horses some way as it allows you to understand how they are build, function and what they need to live a healthy happy life.

Scroll down for all the necessary information of this unique experience that will change the way you look at horses.

## **\*\*FORMAT\*\***

The horse is a fascinating being. We can build a lifelong partnership in true harmony with a creature that is so majestic and powerful. At the same time, the journey can be complex as a

horse can't speak our human language and we often misread / don't understand the signs what horses are trying to tell us and. We often hit many bumps in road like injuries, trauma, fear, stress, disconnection etc.

Although issues are mostly hidden in a deep place, we're often able to see and feel them from the outside. When you pay attention to these details, you'll be able to discover a treasure of information right under your eyes.

During this course you'll make a journey through the life story of the horse and learn to read it 'inside-out'. The facts will be unraveled before your eyes, and you're allowed to feel everything to develop a better understanding of this fascinating being 'horse'. The dissection will have a very interactive nature with an entire team of specialists – including a licensed vet, equine scientist, and anatomist - to answer all your questions and to perform practicums with you, including the effect of several bridles, bits, and saddles on locomotion of the horse.

Under the experienced guidance of the team of Equinestudies (educated by Sharon May-Davis) you'll be investigating the different layers of the horse, how they function separately and how it's intertwined with the whole body at the same time. At the same time, the latest scientific research will be presented to you.

## **\*\*COURSE DETAILS \*\***

This dissection will be a truly unique and life changing journey through the horse from 'inside-out'. It is a must for veterinarians, therapists, saddle / bit fitters, hoof carers, trainers and passionate horse lovers who want to understand and experience the horse from a holistic (whole body) approach on a deeper level.

The goal of the dissection is to learn the horse 'inside-out' so that less horses will end up on the table in the future. Therefore, during these days we'll pay ultimate respect to the horse as it unravels its life story before our eyes. We will be able to see and feel what the horse couldn't tell us. By doing so, we'll give the voice back to the horse. The horse will be our greatest teacher during these 3 days, and we'll be honored to guide you through.

Each day we will tackle different parts of the body.

Day 1 we will study the head, parts of the neck, the shoulder, the front limb, and the digestive system.

Day 2 we will study the deep layers of the neck, shoulder, front limb, and hoof. We will also perform an exercise showing the effects of the bit and different bridles, including a bit less bridle, on the hind end and back. We will also start with the organs and the beginning of the back.

Day 3 we will study the heart and lungs, hyoid, brain, the back, the hind quarter, and hind limbs.

An extensive manual of 120 pages will be provided for. On top, a professional photographer will make beautiful pictures of all-important structures and findings will be provided for free after the course.

**\*\*SUBJECTS IN THIS COURSE\*\***

- Fascia.
- Muscle layers and their function and connections
- Joints and attachment of muscles
- Tendons and ligaments
- Veins
- Head, hyoid and nerves
- Lymph nodes

<https://www.thirzahendriks.com/events-1/online-live-whole-horse-dissection-replay>

- Vertebral column • Organs & Digestive system • Brain & Nervous systems • Tack

influence on movement

## **\*\*PRACTICAL DETAILS\*\***

The live event took place from February 10-12 2022 from 09.00-17.00 CET with coffee & lunch breaks in between.

As an exception and upon many requests, we now offer you to purchase access to the replay for a limited time frame as this will highly likely be our last online dissection now that we can travel again. The REPLAY will be available for 45 days after purchase.

Replay access can be purchased from February 13-March 15<sup>th</sup> after which sale will close. Furthermore, only limited spots are available (max. 35) and thus as soon as all spots are filled, the sale will automatically close. Hence, make sure to not miss out on this unique opportunity.

The Live-Stream / Recording is filmed by a professional video team in HIGH quality full HD. As such, you will get a view of the horse inside-out like you never got before. The feedback of all participants was that due to the excellent camera work and the absence of participants in the room with us, they could see much more details and enjoyed having front row access in super high quality.

The whole event will be in English, but very easy to understand.

This course includes an extensive manual and after the event you will receive a file with beautiful pictures and some short videos later as a forever reminder so that Gypsy's story will not be forgotten and will live on through you.

## **\*\*INVESTMENT\*\***

For tax and insurance purposes, prices will be charged in EUR. Upon purchase of a ticket, it will automatically be converted into the local currency of your country by your bank.

€ 175 one day access

€ 275 two days access

€ 350 full even access

This course includes:

- 1) An extensive manual on Anatomy & Biomechanics [120 pages]
- 2) Presentation of the horse [it's life, why it was donated for dissection and some assessment videos]
- 3) 1-3 days Whole Horse Dissection
- 5) After course materials [photos, summary & short videos]
- 6) Access to Closed Facebook group for discussion

## **\*\*REGISTRATION\*\***

After purchasing your ticket, you'll receive an automatic conformation.

From there, you will receive an email with all details and how to access the replay link within 12HRS after purchase.

There will be a helpdesk available for you in case you run into problems.

## **\*\*CANCELLATION POLICY\*\***

There will be no refund upon cancellation on behalf of the participant. However, you could find someone else interested to take over your spot.
