

Functional Horse Training

Combining art with science to establish optimal movement

ONLINE LIVE WHOLE HORSE DISSECTION

“Simplicity is the greatest achievement of knowledge but simplicity without knowledge is the greatest cause of equine injuries” - Cornille 2012

Have you always wanted to learn from the horse “inside-out”? Join us for the unique opportunity to participate in a Whole Horse Dissection LIVE (**February 10-12 2022**) from your own home to study the horse 'inside-out'. It will be very interactive as if you're in the room with us and you can ask questions ... all day!

This event is an IDEAL solution if you are still a bit doubting whether this is something for you OR if you want the luxury of this unique experience brought to your home!

Scroll down for all the necessary information of this unique experience that will change the way you look at horses.

****FORMAT****

The horse is a fascinating being. We can build a lifelong partnership in true harmony with a creature that is so majestic and powerful. At the same time, the journey can be complex as a horse can't speak our human language and we often misread / don't understand the signs what horses are trying to tell us and. We often hit many bumps in road like injuries, trauma, fear, stress, disconnection etc.

Although issues are mostly hidden in a deep place, we're often able to see and feel them from the outside. When you pay attention to these details, you'll be able to discover a treasure of information right under your eyes.

During this course you'll make a journey through the life story of the horse and learn to read it 'inside-out'. The facts will be unraveled before your eyes, and you're allowed to feel everything to develop a better understanding of this fascinating being 'horse'. The dissection will have a very interactive nature with an entire team of specialists – including a licensed vet, equine scientist, and anatomist - to answer all your questions and to perform practicums with you, including the effect of several bridles, bits, and saddles on locomotion of the horse.

Under the experienced guidance of the team of Equinestudies (educated by Sharon May-Davis) you'll be investigating the different layers of the horse, how they function separately and how it's intertwined with the whole body at the same time. At the same time, the latest scientific research will be presented to you.

****COURSE DETAILS ****

This dissection will be a truly unique and life changing journey through the horse from 'inside-out'. It is a must for veterinarians, therapists, saddle / bit fitters, hoof carers, trainers and passionate horse lovers who want to understand and experience the horse from a holistic (whole body) approach on a deeper level.

The goal of the dissection is to learn the horse 'inside-out' so that less horses will end up on the table in the future. Therefore, during these days we'll pay ultimate respect to the horse as it unravels its life story before our eyes. We will be able to see and feel what the horse couldn't tell us. By doing so, we'll give the voice back to the horse. The horse will be our greatest teacher during these 3 days, and we'll be honored to guide you through.

Each day we will tackle different parts of the body.

Day 1 we will study the head, parts of the neck, the shoulder, the front limb, and the digestive system.

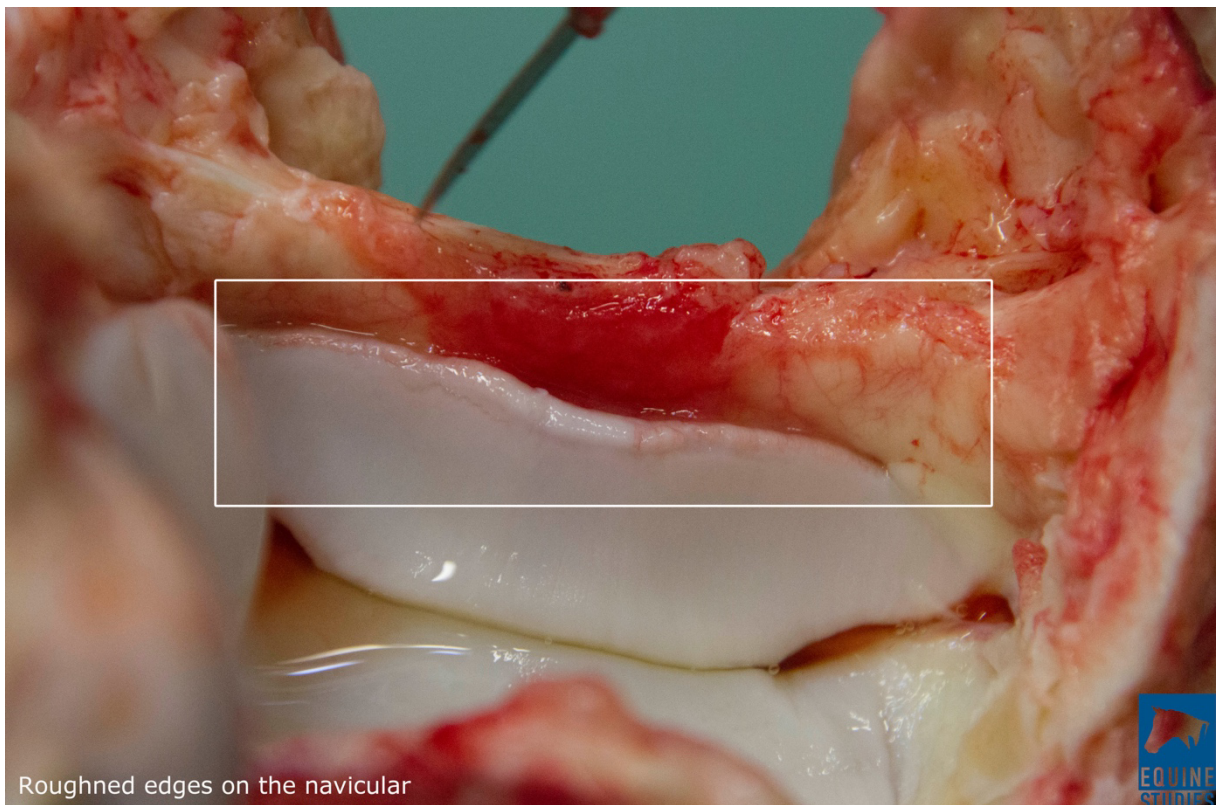

Day 2 we will study the deep layers of the neck, shoulder, front limb, and hoof. We will also perform an exercise showing the effects of the bit and different bridles, including a bit less bridle, on the hind end and back. We will also start with the organs and the beginning of the back.

Day 3 we will study the heart and lungs, hyoid, brain, the back, the hind quarter, and hind limbs.

An extensive manual of 120 pages will be provided for. On top, a professional photographer will make beautiful pictures of all-important structures and findings will be provided for free after the course.

****SUBJECTS IN THIS COURSE****

- Fascia. • Muscle layers and their function and connections • Joints and attachment of muscles • Tendons and ligaments • Veins • Head, hyoid and nerves • Lymph nodes
- Vertebral column • Organs & Digestive system • Brain & Nervous systems • Tack influence on movement

****DATES & TIMES ****

February 10-12 2022 from 09.00-17.00 CET daily

There will be coffee & lunch breaks in between

****PRACTICAL DETAILS****

The Live-Stream will be filmed by a professional video team in HIGH quality full HD. As such, you will get a view of the horse inside-out like you never got before.

The feedback of the past livestream was that viewers could see everything much more in detail as the camera is giving 'front row' access in super high quality.

The whole event will be in English, but very easy to understand. The team is Dutch so quick Dutch translation is always possible.

Naturally there is a chatroom for questions as well. Someone will be monitoring the chatroom full time. All questions will be collected and answered during assigned question rounds.

Can't watch it live? Don't worry, the full dissection will be available for 8 days after the live stream so you can watch the replay later!

This course includes an extensive manual and after the event you will receive a file with beautiful pictures and some short videos later as a forever reminder so that the horse's story will not be forgotten and will live on through you.

****INVESTMENT****

For tax and insurance purposes, prices will be charged in EUR. Upon purchase of a ticket, it will automatically be converted into the local currency of your country by your bank.

€ 150 one day

€ 250 two days

€ 325 full event

There is a 10% discount for a full 3-day ticket if you sign up before January 15th 2022. Use code: [earlybird2022](#) on the website.

This course includes:

- 1) An extensive manual on Anatomy & Biomechanics
- 2) Presentation of the horse [it's life, why it was donated for dissection and some assessment videos]
- 3) 1-3 days Whole Horse Dissection
- 4) Asking Questions
- 5) After course materials [photos, summary & short videos]
- 6) Access to Closed Facebook group

****REGISTRATION****

<https://www.thirzahendriks.com/events-1/online-live-whole-horse-dissection-3>

After purchasing your ticket, you'll receive an automatic conformation. One week before the event starts you'll receive the manual and file with the presentation of the horse.

From there, you will also receive a link on how to join in on the live stream 5 days beforehand.

Two days before the live stream there will be a test to make sure you're good to go. It is super easy; you'll just have to click on the link when the event starts and you're good to go if you have internet.

There will be a live helpdesk available for you in case you run into problems.

Times are in CET but you can watch it worldwide. IF you are in a different time zone and CAN'T watch live you could also watch it later as the live stream will be archived for 8 days [so you can watch it later at your convenience] !!

****CANCELLATION POLICY****

There will be no refund upon cancellation on behalf of the participant. However, you could fine someone else interested to take over your spot.
